Team: E. T.

From Left to Right: Ian, Ahsan, Jubin, Lucy and Marhaba

Introduction

E.T.'s goal is to learn about software development methodologies that are used currently in industries. E.T.'s team members look forward to improving their efficiency and effectiveness when building large projects. Team E.T. consists of upper year computer science specialist students. This makes the team highly productive and diligent. Each member has a deep understanding of various programming languages including Java, Python and C, algorithms and data structures. They are prompt in resolving problems while producing optimal solutions. E.T. is a highly motivated and responsible team that excels in showing initiative, delivering the best products to clients and is hardworking. E.T is utterly excited to work on CSCC01 project.

Team Members

Lucy Xing

Lucy Xing is currently a fourth year student at the University of Toronto Scarborough working towards a Specialist in Computer Science — Software Engineering Stream. In the past years at UTSC, she became proficient in various programming languages such as Python, Java, and C. Through previous projects and assignments, she also became familiar with SQL, OS161, Android SDK, and many others. For eight months from May 2015 to Dec 2015, she worked at CaseWare International Incorporated as a Test Developer where she developed automated test suites for both Desktop and Web APIs. During this time, she was introduced to performance testing and developed basic testing scenarios. She has also worked at the Toronto Public Library where she ensured shelf environment and provided technical support to patrons when needed. In her spare time, she enjoys playing badminton, planting trees, and learning new things.
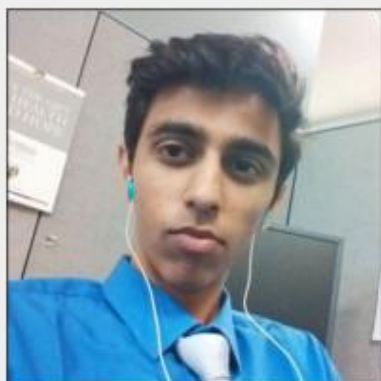

Ian Ferguson

Ian Ferguson is a 4th year Computer Science student in the Software Engineering Specialist stream, at the University of Toronto Scarborough Campus. Having obtained a bachelors degree in Commerce (CA stream accounting major) at the University of Ontario Institute of Technology in 2011, Ian worked in the accounting industry from 2011 to 2014; finishing as a managerial accountant at the former Alpha Group of companies (since merged into the TSX). At Alpha Group Ian was exposed to large scale software development, as Alpha Group was a main provider of electronic trading systems and software used by the TSX. While at Alpha Group Ian learned about and developed a passion for software creation and decided to make a career change into the software industry after Alpha was merged with the TSX. In his free time Ian can often be found on the UTSC climbing wall, or scuba diving the St. Lawrence.

Jubin Patel

Jubin Patel is a 3rd year computer science student in the software engineering stream. He was introduced to computer science in grade 10, however he fell in love with it in grade 11 and that's when he decided to pursue a career in it. He has been coding ever since high school, and is familiar with various programming languages and testing methodologies. He has completed three co-op work terms, at two different government ministries, working in agile team environment as a Quality Assurance assistant. The work experience gained through co-op has allowed Jubin to be exposed both business side, working with clientele information and technical side, where he was exposed to various software used in Quality Assurance. When Jubin isn't on his computer doing what he loves, you can usually find him at the basketball courts, at the gym playing badminton or working out.

Marhababanu Chariwala

Marhaba is pursuing bachelor's in Computer Science and Mathematics at the University of Toronto at Scarborough specializing in Software Engineering. She enjoys challenges and critical thinking and can get creative with the solutions. She shows initiative in learning new materials. Through academic and co-op work term she has acquired advance knowledge and experience in programming using various languages. In 2014, she started working for the CFL at the University of Toronto Scarborough as website management assistant and learned about content management system, HTML and CSS. She worked as Junior Project Coordinator at Ministry of Ontario and assisted in training and testing of several different web based applications. During her last work term, she worked as Technical Analyst at CIBC's middleware operations, where she provides assistance in the maintenance of application servers and automation of processes of domain replication and ITIL ticket cutting.

Ahsan Zia

Ahsan Zia is currently a 3rd year student at University of Toronto Scarborough campus. He is currently enrolled in UTSC Honours BSc (CSC, MAT & STA) and is planning to graduate in 2018. Throughout his time at the University of Toronto he has made himself proficient with many programming languages such as C, Java, Python, and PHP. In the past he has also worked with TheHub at UTSC as a front end and back end developer. He is also part of the Scarborough Pre-med Society group at UTSC where he is the lead graphics designer and webmaster. He is currently working as a web developer with Baycrest hospital to optimize their website, repair bugs, and add additional functionality to their website. Ahsan plans to use his skills, experience and knowledge to contribute as much as possible to the group's productivity
